**D**r. Rakesh Mangal is one of the few doctors in America who has completed fellowship trainings in both advanced reproductive laparoscopic surgery as well as reproductive endocrinology and infertility, allowing him to be the medical and surgical specialist for endometriosis, pelvic pain and infertility.

Nearly a decade ago, Dr. Mangal joined his friend and teacher Dr. Robert Franklin, an internationally known endometriosis and infertility surgeon, in private practice at Obstetrics and Gynecological Associates (OGA) of Houston. Founded in 1962, it is now one of the largest and most technologically advanced ob-gyn groups in the U.S. OGA's assisted reproductive center, now called Fertility Specialists of Houston (FSH), is one of the largest and consistently successful IVF programs in the nation.

In addition to writing numerous articles and chapters in medical textbooks on infertility and endometriosis surgery, Dr. Mangal teaches surgical techniques to doctors in training. His patients boast about his individualized care, compassion and understanding, from initial consultation through the entire treatment.

One of his endometriosis patients who flew down from New Jersey just for surgery writes of her pregnancy, "You have made a miracle come true ... I really appreciate the time you took to listen to me and treat my symptoms. Finally, someone was listening to me!"

Another patient with extensive endometriosis requiring bowel resection, large chocolate ovarian cysts, and extensive adhesions writes of her newborn, "I truly believe that she wouldn't be here if you hadn't done such a terrific job in my surgery ... If you hadn't taken the time you did to do what you did to save my ovaries as well as my right tube, she wouldn't be here and we might still be struggling."

Dr. Mangal is the president-elect for the Indian Doctors Association of Houston with over 1,000 Indian doctors residing in this area. The association has a charity clinic which provides free general medical care to anyone with financial difficulty. In his free time, Dr. Mangal enjoys travel and spending time with his wife, Seema, and daughter, Reeti.

**Specialty:** Reproductive endocrinology and infertility, obstetrics and gynecology with advanced training in endometriosis and pelvic pain surgeries
